Dispatcher Startup Kit

Workflow and checklists for organizing dispatch services

Before Taking a Client

• Confirm carrier/owner-operator business information and applicable authority requirements.

• Put the scope of dispatch services and compensation in writing.

• Confirm required insurance and operating documents.

• Define who handles booking, rate confirmations, paperwork, tracking, accessorials, and billing.

Client Intake Checklist

• Carrier/driver name and business name

• Equipment type and dimensions

• Home/base area

• Preferred lanes

• States/regions served

• Commodity preferences

• Minimum acceptable rate

• Hours of operation

• Contact method

• Document expiration tracking

Load-Finding Workflow

• Define target lanes and equipment.

• Search qualified freight sources.

• Compare pickup/delivery times, mileage, rate, commodity, and accessorial terms.

• Confirm the carrier can legally and safely perform the load.

• Present the opportunity to the carrier for approval before booking.

• Save rate confirmation and instructions.

• Track shipment through completion.

Daily Dispatch Checklist

• Review today's loads and appointments

• Confirm driver location/status

• Check pickup and delivery appointments

• Monitor delays and detention

• Save confirmations and receipts

• Update customer/carrier

• Record revenue and expenses

• Plan next available load

Compliance Note

• Dispatching and brokering are not identical activities. The exact regulatory treatment depends on how services are structured and how transportation is arranged. Review applicable FMCSA requirements and obtain professional advice when needed.

MMJ Digital Business Hub • General business education and templates. Review legal, tax, insurance, and regulatory requirements with qualified professionals where appropriate.
